Would you please do an inventory of your straps and if you have more than you need, please return to the yard. As you are aware, these do not come free and it would be nice if we could make use of our existing inventory....thanks
If you didn't already see the memo; you no longer have to record your fuel or mileage on the back of your trip envelope. The ONLY info we need on your trip is the Beginning and ending Odometer AND any/if home fuel from the yard. All the info we need comes over automatically on our system....
